OFFICIAL PAPER OF THE CITY.

From Madison.

EDITORIAL CORRESPONDENCE OF THE SENTINEL.

MADISON, March 2.

The morning dawned bright and clear, and the day too light, snow settling to such consti-

tency as will make first rate sleighing for a while.

By the proceedings of the Senate yesterday it will be seen that Mr. Palmer has introduced

that body a new bill to amend the Charter of the

U. S. V. R. R. Co., the title of which refers

to the proposed extension. I have not

seen the bill, and do not know what changes have

been made from the original bill, but presume that

it avoids most, if not all, of the points objected to

by the Governor.

If this be the case, I congratulate

the friends of that road upon their return to

Madison, & their victory in taking the same

contested by other companies here. But,

what becomes of the Attorney General's opinion,

which controverts the Governor's objections?

Mr. Huchschmidt has introduced in the Senate

a bill providing for biennial sessions of the Legis-

lature. There is no probability of its passage.

If the present Legislature shall be wise enough to

pass the bill before the House, devolving a vast

amount of local business upon the county

boards, and make up in mind to keep the spirit of

the Constitution relative to general laws, there

may be a propriety in bringing in a proposition for biennial sessions, and some prospect of pass-

ing it.

The special committee on the liquor laws was

instructed this morning to report by Thursday

evening. There were 129 names added in petition

to the Milwaukee & 97 against.

The Hungarian resolutions, passed by the Senate

on the 1st, after the above business was

dispersed, and the whole morning was spent

on Wisconsin, to one of the new Stores in

Prentiss' Block, corner of Mason and East

Waterloo. The Board of Trade was called to

order and unanimously adopted the following

resolution and resolution:

"Resolved, In the opinion of this Meeting, the

controlling members of the Post Office in this

City, from its present position, to point for less

and more frequent services; for these

there were not several good species; for these

there were not any but inferior. But I am

disposed to assert that bad, or poor, species

always waste time. All members are not equally

skillful in speech; if such were the case, they

should never get through. But the session is not

named, and no possible good that could be had

from the Post Office Department, and to circulate

the news of this meeting, it is proposed to call a

meeting of the Post Office Department, and to

call a meeting of the Post Office Department, and to

call a meeting of the Post Office Department, and to

Constitution of the Lungs.

Secured—When Consumption commences it's work upon the lungs and bronchial tubes, principally.

As it advances, it gets deeper, becomes more frequent, and intensifies with the expectation of matter, which is sometimes sputum, but at others assumes a yellowish or greenish hue, and often has a strong恶臭.

The disease, which has been called Consumption, is the most fatal of all diseases, and its progress is rapid.

The patient will experience some difficulty in breathing accompanied, perhaps, with a pain in the chest, and frequently a dry cough, which is often violent, and frequent cold chills, and often with expectant eight nights.

Those threatened with Consumption should be in mind that "Nature's Balsom of Wild Cherry" is known to have performed cures of Consumption, and that the General was often successful when other physicians except the General of Mexico, had given up hope.

I have, for months, known the exact facts, touching this incident, but did not feel at liberty to make it public, as I have been told that the General's name was not to be mentioned in the press.

Mr. Lawrence reported a substitute for Sec. 11 taxing each Bank 1 per cent. per annum on its notes payable semi-annually for payment of salary of Comptroller etc.—ordered printed and Committee to vote.
